Joint MAX<sup>®</sup> incorporates a balanced formula of Glucosamine, Chondroitin and Vitamin C into one highly palatable tablet. It also contains Zinc and N-acetyl-cysteine for added joint support. Joint MAX<sup>®</sup> is classified as a nutraceutical.

Joint MAX<sup>®</sup> is an excellent option for pets suffering from osteoarthritis, hip dysplasia, and other conditions affecting the joints. It contains more Glucosamine and Chondroitin than Cosequin and Glyco-Flex, yet is more economical than both. Owners with pets currently taking Deramaxx, Rimadyl, EtoGesic, Metacam or Zubrin will also benefit from the additional use of Joint MAX<sup>®</sup>.

Joint MAX<sup>®</sup> helps combat the stiffness and achiness that occurs when the cartilage between your pet's bones breaks down. Joint MAX<sup>®</sup> naturally lubricates your pet's joints and helps to gradually rebuild cartilage.

## DOES IT HELP?

Trials have revealed that Joint MAX<sup>®</sup> is effective in relieving the discomfort associated with osteoarthritis.

In a group of 13 veterinary clinics, 76% of pet owners described the results after 6 weeks of Joint MAX<sup>®</sup> supplementation as "Excellent" or "Very Good" while another 11% classified results as "Good." The repurchase rate was 84%.

## BENEFITS

- Safe & effective.
- Can be given alone or along with other meds like Rimadyl, Deramaxx and EtoGesic.
- Can even eventually reduce the need for these medications.
- Contains Chondroitin, Glucosamine, Manganese and Zinc.
- Tasty tablet can be given directly or crumbled on food.
- Less expensive than other leading supplements yet contains higher levels of Chondroitin & Glucosamine.

## Joint Treats<sup>®</sup>

Joint Treats<sup>®</sup> is a tasty all-natural pet treat with Glucosamine, Creatine & MSM that helps keep joints healthy and dogs happy. Give them to your dog as a treat, and to provide joint relief or help prevent joint problems.

- All Natural - No Artificial Flavors or Colors
- No BHA, Added Tallow or By-Products
- Can be used with joint supplements such as Joint MAX<sup>®</sup>, Cosequin, Synovicre or Glycoflex.
- Both healthy and delicious for younger and older dogs alike
- Joint Treats<sup>®</sup> is low in calories - only 10 calories per treat
- Dog Tested, Veterinarian Approved!
