“ This product is the best thing I ever purchased for my Sammy. She is a large dog, a German Shephard/Boxer mix and started having arthritis pain just about two years ago. She could barely go up steps, let alone do anything else. Just after a week of Joint MAX Triple Strength Chewables, along with the Rimadyl, she was starting to act like a puppy all over again. Last summer, she even had even cut down on the Rimadyl to 25mg a day and now she rarely needs it at all! ”

- Greg L., California

“ Tran-Quil Tabs are great! They're mild and my dog loves to chew them. He takes them very easily back into his kennel box and chews them up. After a few minutes, he stops all that pacing back and forth cause he's bored. I have a high energy Siberian Husky. He gets 4 walks a day but he could go for 4 more. I do not give it to him everyday. I only give it to him when the weather is bad and I can't take him out for all 4 of his walks and he gets a little nutty in the house. They work wonderfully. I definitely suggest people get them for their dogs. ”

-Grace, Arizona

“ My cat has been taking Joint MAX liquid for just over 3 weeks. I sincerely thank you for creating a formula for cats that is “doable”. I purchased another brand's chewable tablets for him, but a steak knife would not cut those pills and my cat was not interested. I think I already see positive results and am thrilled! ”

- Teena G., New York

“ My 8-year-old female shepherd's coat looked like a lamb. Really strange looking and you could pull clumps of fur out. After about 3 weeks of using Shed Pro, there has been a great improvement in her coat. There is less fur to pull out and the coat is soft once again and not coarse and dry like it was. So far it has worked quite well for her. ”

-Marcia K., Texas
